Energy estimation report

Note: These results are currently evaluated by a fully automated process. *Users should be advised to use and interpret these products with caution.*

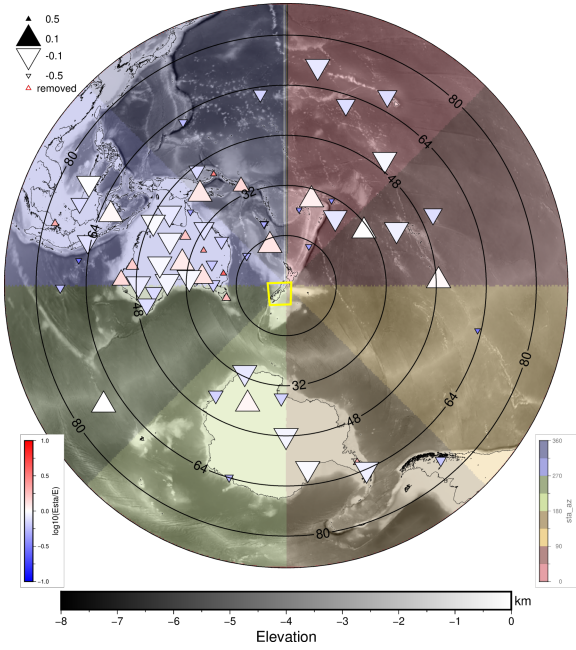

--------- Event information ---------
2016-11-13T11:02:56.300000Z
Magnitude 7.8 Mw
Moment 6.77e+20 (N.m)
-42.03 +173.85 19
Region : S.Pacific
Subregion : NZ-S.Island

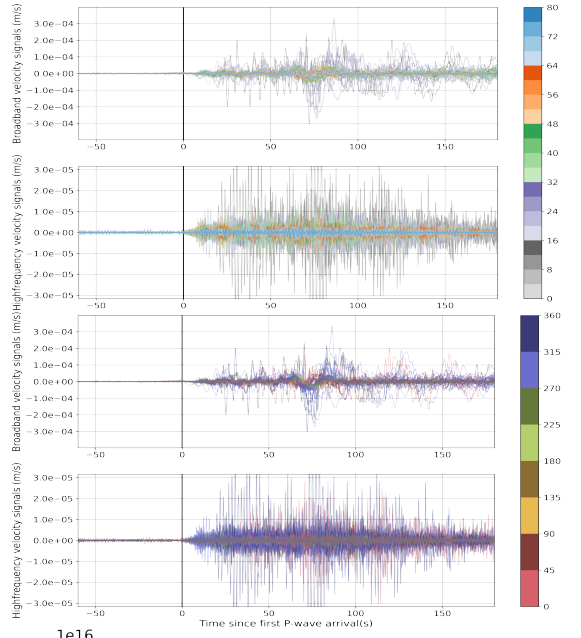

------ Estimation information -------
v2.3.RT
iteration n°3 : 10-80
network azimuthal gap : 35°
network distance gap : 12°
BB : 73 stations [['HHT', 'BHZ', 'HHZ']]
Time after P-waves : 180s

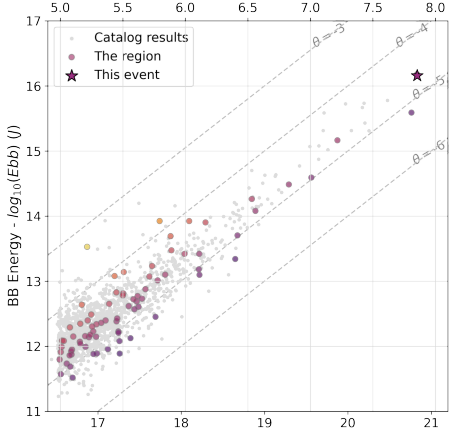

---------- Estimation time ----------
Data collection : -9999s
Preprocessing : 2s
Energy estimation : 45s
TOTAL : 47s

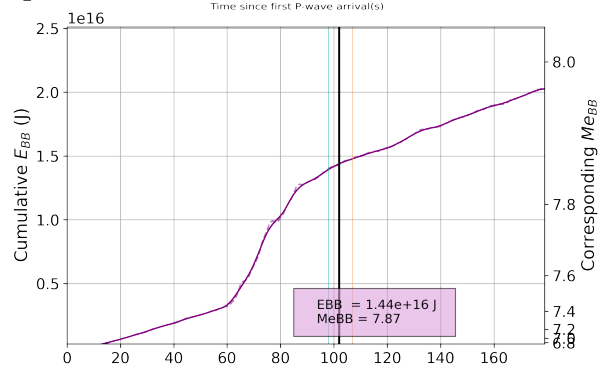

Confidence level estimates : GREAT

Estimate of scaled energy
based on Choy et al (2006) apparent stress
and PREM rigidity modulus
